**ASSESSMENT  
INFORMATION**

Year 8 2025

At Picton High School, we value:

- *Staff who are committed to the learning and achievement of every student in an environment where success and effort is celebrated.*
- *A culture of respect, tolerance and inclusivity where students strive to achieve their personal best.*
- *A safe and healthy school that fosters mutually respectful partnerships with the community.*

# PHS Assessment Policy (7-10)

## Assessment procedures (Years 7-10)

### Missed Assessment Tasks

If a student knows it is inevitable that they will miss or has missed an assessment task, they should contact their class teacher immediately after the fact is known. Except in unforeseen circumstances, any student who will be unable to undertake an assessment task on the published date should advise the appropriate class teacher of this matter prior to the published date.

### Illness, Injury or Misadventure

Students must attend school on the date of a task or date the task is due. If a student is sick and cannot attend or an unforeseen situation or emergency arises, an 'Illness and Misadventure' application should be completed and presented to the class teacher on the first day of return to school or, if possible, prior to the original submission date. If a student fails to complete a task due to illness/misadventure and the class teacher considers the student has a valid reason, an extension may be granted or a grade may be awarded based on a substitute task.

If the task is an in-class task, where possible, students will be provided with an alternative task when they return to school. If it is not possible to provide a substitute task or an extension, the class teacher will consult with the Head Teacher to seek a resolution. **The Head Teacher may also refer an appeal directly to the Deputy Principal for review. Students with prolonged absences should follow the same procedure.**

Where there is no valid reason for not completing an assessment task, the school will enact their student discipline and management policies. This may include the student being required to complete the outstanding assessment during lunch times with their relevant teacher and/or Head Teacher, an assessment warning letter and/or phone call home being completed, the student being required to attend the Tuesday afternoon Study Centre or other disciplinary consequences as decided upon by the teacher and Head Teacher of the faculty. These disciplinary actions are designed to give the student every opportunity to meet outcomes and gain a grade which reflects their true ability.

If a teacher is absent on the day an assessment task is due/scheduled to take place, it will be the responsibility of the Head Teacher to implement their faculty policy processes for staff absences. This may include re-scheduling the task to another date or assisting another staff member to administer the assessment successfully.

### Hand in tasks

Hand in tasks must be submitted **before 9:00am** on the due date to the class teacher or faculty Head Teacher unless specified differently on the official assessment notification for that particular task. If a class teacher is absent on the day a task is due, students must ensure the task is submitted to the faculty Head Teacher. A student can seek an extension of time to submit the task by completing the appropriate appeals form (illness/misadventure or change of due date). Students seeking an extension of time for an assessment for any reason other than those associated with illness and misadventure must submit 'Request for change of due date' appeals form in advance of the due date before the extension can be considered. The class teacher will only grant an extension of time if:

- the student gives an acceptable and compelling reason for the impending late submission of the assessment task; and
- the extension of time is negotiated prior to the due date.

If the reason offered is acceptable and prior negotiation has occurred, no penalty will be incurred so long as the assessment task is submitted on or before the negotiated date. It is unlikely that an extension of time in excess of two (2) weeks will be granted. Students are not to assume the extension of time will be granted. If the class teacher has not granted an extension of time, and the assessment task is not submitted or submitted after the due date, consequences according to the Student Management Policy and Assessment Policy will be enacted. In exceptional circumstances, an extension of time may be granted after the original due date.

An extension of time will not be granted if:

- the reason offered is deemed unacceptable
- no reason is offered
- the student did not lodge a written application for an extension of time with the appropriate teacher prior to the due date.

Students must submit all tasks regardless of how late they are submitted. Feedback provided to students based on their work in the task is a valuable part of the learning process.

### **Examinations**

Students may be required to sit formal examinations. These may be completed in a timetabled examination week in an examination setting (such as the hall) or may be completed in class at any time (as outlined in a subject's assessment schedule). Any student who fails to sit an examination during the specified examination period will be required to complete an 'Illness and Misadventure' form and submit this on the first day they return to school. If appropriate documentation is not provided, the school will issue consequences in accordance with the Student Management Policy. If students feel that the consequences enacted by their teacher and/or the Head Teacher of a faculty are inappropriate, an appeal can be lodged with the Deputy Principal.

### **Malpractice in Assessment Tasks**

Malpractice is any activity undertaken by a student that allows them to gain an unfair advantage over others or places other students at a disadvantage. It includes, but is not limited to:

- a student being in possession of a mobile phone during an assessment task
- using material directly from books, journals, CDs or the Internet without reference
- building on the ideas of another person without reference to the source
- copying, buying, stealing or borrowing another person's work and presenting it as one's own
- submitting work to which another person, a parent, coach or expert has contributed substantially
- using words, ideas, designs or workmanship of others in practical and performance tasks
- paying someone to write or prepare material
- not making a genuine effort with an assessment task
- contriving false explanations to explain work not handed in by the due date
- assisting another student to engage in malpractice (e.g. giving a student a copy of your assessment task even if you tell them to change the words).

Issues of malpractice need to be investigated by the Head Teacher of the respective course. The **Head Teacher** will:

- advise the student(s) of the lodgment of the issue.
- provide the student(s) with an opportunity to address the issue
- plan a course of action and communicate this to the student, the student's parents and the class teacher.

If the malpractice is proven, the Head Teacher will enact consequences from the Student Management Policy and processes from the Assessment Policy. This may include being required to complete the class again, including during lunch breaks or in the Study Centre on Tuesday afternoons. Students are made aware that sharing their task with other students prior to it being submitted may be considered as malpractice and lead to disciplinary consequences for this student also.

### **Non serious attempts**

If a student's attempt at a particular task results in a seriously low grade, the question of whether the attempt was a genuine one is a matter for the teacher's professional judgment.

Students must make a genuine attempt to complete course requirements. These requirements include students applying themselves with diligence and sustained effort to all set tasks and experiences provided in the course by the school.

If a teacher deems that a student has made a non-serious attempt at a task, the student will be required to resubmit/re attempt the task. This may take place during their own time (i.e. lunch time) at school or the student may be permitted to work on the task at home; this will be decided upon by the classroom teacher and/or Head Teacher of the faculty. Students may also face consequences according to the Student Management Policy. If a student believes that the consequences enacted by their teacher and/or the Head Teacher of a faculty are inappropriate, an appeal can be lodged with the Deputy Principal.

### **Starting at Picton High School after the Assessment Program has begun**

Students who enrol after the assessment program in their subjects has begun will be required to do all further tasks in the program. To help allocate the most appropriate grades at the end of the reporting period, a student's performance on these tasks will be compared to descriptors on the Common Grade Scale.

### **Additional consequences for late submission**

To ensure equity, students who submit work late without successful documentation will be deemed ineligible to receive academic commitment awards at the annual Presentation evening as one criteria of these awards is consistently following course requirements. Students may also place their position on the Rewards Excursions in jeopardy as they will not have demonstrated consistent application throughout the year. Report comments may also refer to late or non-submission of tasks. Technology breakdowns are not a valid or acceptable excuse for late or non-submission of tasks.

Please check the Picton High School website to keep updated. Assessment tasks are uploaded to the website approximately two weeks before they are due under the following tabs:

- Assessment tasks
- Assessment and reporting
- Year 8 assessment tasks

The tasks will remain on the site until the end of the school year.

Please note, all students are encouraged to use Turnitin to check for AI / plagiarism before submitting the final copy of any task to ensure the work is sufficiently their own.

**Outcomes: A student**

MA4-INT-C-01	Compares, orders and calculates with integers to solve problems
MA4-FRC-C-01	Represents and operates with fractions, decimals and percentages to solve problems
MA4-RAT-C-01	Solves problems involving ratios and rates, and analyses distance-time graphs
MA4-ALG-C-01	Generalises number properties to operate with algebraic expressions including expansion and factorisation
MA4-IND-C-01	Operates with primes and roots, positive-integer and zero indices involving numerical bases and establishes the relevant index laws
MA4-EQU-C-01	Solves linear equations of up to 2 steps and quadratic equations of the form $ax^2=c$
MA4-LIN-C-01	Creates and displays number patterns and finds graphical solutions to problems involving linear relationships
MA4-LEN-C-01	Applies knowledge of the perimeter of plane shapes and the circumference of circles to solve problems
MA4-PYT-C-01	Applies Pythagoras' theorem to solve problems in various contexts
MA4-ARE-C-01	Applies knowledge of area and composite area involving triangles, quadrilaterals and circles to solve problems
MA4-VOL-C-01	Applies knowledge of volume and capacity to solve problems involving right prisms and cylinders
MA4-ANG-C-01	Applies angle relationships to solve problems, including those related to transversals on sets of parallel lines
MA4-GEO-C-01	Identifies and applies the properties of triangles and quadrilaterals to solve problems
MA4-DAT-C-01	Classifies and displays data using a variety of graphical representations
MA4-DAT-C-02	Analyses simple datasets using measures of centre, range and shape of the data
MA4-PRO-C-01	Solves problems involving the probabilities of simple chance experiments
MAO-WM-01	Develops understanding and fluency in mathematics through exploring and connecting mathematical concepts, choosing and applying mathematical techniques to solve problems, and communicating their thinking and reasoning coherently and clearly

**Outcomes: A student:**

SC4-4WS	identifies questions and problems that can be tested or researched and makes predictions based on scientific knowledge.
SC4-5WS	collaboratively and individually produces a plan to investigate questions and problems.
SC4-6WS	follows a sequence of instructions to safely undertake a range of investigation types, collaboratively and individually.
SC4-7WS	processes and analyses data from a first-hand investigation and secondary sources to identify trends, patterns and relationships, and draw conclusions.
SC4-8WS	selects and uses appropriate strategies, understanding and skills to produce creative and plausible solutions to identified problems.
SC4-9WS	presents science ideas, findings and information to a given audience using appropriate scientific language, text types and representations.
SC4-10PW	describes the action of unbalanced forces in everyday situations.
SC4-11PW	discusses how scientific understanding and technological developments have contributed to finding solutions to problems involving energy transfers and transformations.
SC4-12ES	describes the dynamic nature of models, theories and laws in developing scientific understanding of the Earth and solar system.
SC4-13ES	explains how advances in scientific understanding of processes that occur within and on the Earth, influence the choices people make about resource use and management.
SC4-14LW	relates the structure and function of living things to their classification, survival and reproduction.
SC4-15LW	explains how new biological evidence changes people's understanding of the world.
SC4-16CW	describes the observed properties and behaviour of matter, using scientific models and theories about the motion and arrangement of particles.
SC4-17CW	explains how scientific understanding of, and discoveries about, the properties of elements, compounds and mixtures relate to their uses in everyday life.

**Outcomes** - A student:

### MATHEMATICS

MA4-1WM	communicates and connects mathematical ideas using appropriate terminology, diagrams and symbols
MA4-2WM	applies appropriate mathematical techniques to solve problems
MA4-3WM	recognises and explains mathematical relationships using reasoning
MA4-5NA	operates with fractions, decimals and percentages
MA4-6NA	solves financial problems involving purchasing goods
MA4-7NA	operates with ratios and rates, and explores their graphical representation
MA4-8NA	generalises number properties to operate with algebraic expressions
MA4-10NA	uses algebraic techniques to solve simple linear and quadratic equations
MA4-11NA	creates and displays number patterns; graphs and analyses linear relationships; and performs transformations on the Cartesian plane
MA4-12MG	calculates the perimeters of plane shapes and the circumferences of circles
MA4-13MG	uses formulas to calculate the areas of quadrilaterals and circles, and converts between units of area
MA4-14MG	uses formulas to calculate the volumes of prisms and cylinders, and converts between units of volume
MA4-16MG	applies Pythagoras' theorem to calculate side lengths in right-angled triangles, and solves related problems
MA4-19SP	collects, represents and interprets single sets of data, using appropriate statistical displays
MA4-20SP	analyses single sets of data using measures of location, and range
MA4-21SP	represents probabilities of simple and compound events
MA4-1WM	communicates and connects mathematical ideas using appropriate terminology, diagrams and symbols
MA4-2WM	applies appropriate mathematical techniques to solve problems
MA4-3WM	recognises and explains mathematical relationships using reasoning

**SCIENCE**

SC4-4WS	identifies questions and problems that can be tested or researched and makes predictions based on scientific knowledge.
SC4-5WS	collaboratively and individually produces a plan to investigate questions and problems.
SC4-6WS	follows a sequence of instructions to safely undertake a range of investigation types, collaboratively and individually.
SC4-7WS	processes and analyses data from a first-hand investigation and secondary sources to identify trends, patterns and relationships, and draw conclusions.
SC4-8WS	selects and uses appropriate strategies, understanding and skills to produce creative and plausible solutions to identified problems.
SC4-9WS	presents science ideas, findings and information to a given audience using appropriate scientific language, text types and representations.
SC4-10PW	describes the action of unbalanced forces in everyday situations.
SC4-11PW	discusses how scientific understanding and technological developments have contributed to finding solutions to problems involving energy transfers and transformations.
SC4-12ES	describes the dynamic nature of models, theories and laws in developing scientific understanding of the Earth and solar system.
SC4-13ES	explains how advances in scientific understanding of processes that occur within and on the Earth, influence the choices people make about resource use and management.
SC4-14LW	relates the structure and function of living things to their classification, survival and reproduction.
SC4-15LW	explains how new biological evidence changes people's understanding of the world.
SC4-16CW	describes the observed properties and behaviour of matter, using scientific models and theories about the motion and arrangement of particles.
SC4-17CW	explains how scientific understanding of, and discoveries about, the properties of elements, compounds and mixtures relate to their uses in everyday life.

YEAR 8 INQUIRY TASK GRID 2025											SUBJECT: IBL Humanities

#### ENGLISH

EN4-1A	responds to and composes texts for understanding, interpretation, critical analysis, imaginative expression and pleasure.
EN4-2A	effectively uses a widening range of processes, skills, strategies and knowledge for responding to and composing texts in different media and technologies.
EN4-3B	uses and describes language forms, features and structures of texts appropriate to a range of purposes, audiences and contexts.
EN4-4B	makes effective language choices to creatively shape meaning with accuracy, clarity and coherence.
EN4-5C	thinks imaginatively, creatively, interpretively and critically about information, ideas and arguments to respond to and compose texts.
EN4-6C	identifies and explains connections between and among texts.
EN4-7D	demonstrates understanding of how texts can express aspects of their broadening world and their relationships within it.
EN4-8D	identifies, considers and appreciates cultural expression in texts.
EN4-9E	uses, reflects on and assesses their individual and collaborative skills for learning.

#### HSIE

HT4.1	describes the nature of history and archaeology and explains their contribution to an understanding of the past.
HT4.2	describes major periods of historical time and sequences events, people and societies from the past.
HT4.5	identifies the meaning, purpose and context of historical sources.
HT4.6	uses evidence from sources to support historical narratives and explanation.
HT4.9	uses a range of historical terms and concepts when communicating an understanding of the past.
HT4.10	selects and uses appropriate oral, written, visual and digital forms to communicate about the past
GE4.1	locates and describes the diverse features and characteristics of a range of places and environments.
GE4.2	describes processes and influences that form and transform places and environments.
GE4.6	explains differences in human wellbeing.
GE4.8	communicates geographical information using a variety of strategies.

#### MATHEMATICS

MA4-4NA	compares orders and calculates with integers, applying a range of strategies to aid computation.
MA4-5NA	operates with fractions, decimals and percentages.
MA4-7NA	operates with ratios and rates, and explores their graphical representation.
MA4-8NA	generalises number properties to operate with algebraic expressions.
MA4-10NA	uses algebraic techniques to solve simple linear and quadratic equations.
MA4-12MG	calculates the perimeters of plane shapes and the circumferences of circles.
MA4-13MG	uses formulas to calculate the areas of quadrilaterals and circles and converts between units of area.
MA4-15MG	performs calculations of time that involve mixed units, and interprets time zones.
MA4-18MG	identifies and uses angle relationships, including those related to transversals on sets of parallel lines.
MA4-19SP	collects, represents and interprets single sets of data, using appropriate statistical displays.
MA4-1WM	communicates and connects mathematical ideas using appropriate terminology, diagrams and symbols.
MA4-2WM	applies appropriate mathematical techniques to solve problems.
MA4-3WM	recognises and explains mathematical relationships using reasoning.
